

## Tinning Services

### Automated Tinning

SemiPack's fully automated tinning services restore the finish and soldering properties of leads for both through-hole and surface mount devices. SemiPack provides both RoHS-SnPb and SnPb-RoHS conversions.

Tinned components are processed in compliance with customer requirements and adhere to applicable military specifications, including Government Electronics and Information Technology Association (GEIA) specifications. SSI provides services that adhere to other specifications as requested by our customers.

### Quick Turnaround

SemiPack delivers high-quality service and quick turns. For urgent needs, we have completed "on the spot" orders in hours.
